If you are using black or dark materials, or even bright colors, your Infusible Ink will not show up on it. If you're going to be ordering Cricut supplies and you're shopping on Cricut.com, use code TF10 to save 10% and get FREE shipping on all \$50+ orders. Set the Easy Press 2 set at 400° (Easy Press are not able to get this hot) onto the butcher paper for 15 seconds to remove any moisture that may be in the shirt. Third, place your shirt on an Easy Press Heat Pad and set a sheet of butcher paper (it is included with your Infusible Ink) over the t-shirt. There are several sheets of parchment paper in the Infusible Ink transfer sheets. Heat Resistant Tape - Use this to tape down designs on rounded materials (like can koozies) to prevent the Infusible Ink from moving while it's pressed. Pressing Pillows - Use these when you're pressing shirts, pillows, tote bags, etc. If you want to read more about sublimation, check out this post. This post is sponsored by Michaels. Second, use a lint roller to remove any lint that may be on your shirt. Infusible Ink vs. Where To Buy Infusible Ink Blanks With the popularity of sublimation growing, finding blanks you can use for sublimation and Infusible Ink is becoming easier and easier. Once it cooled, it easily lifted off the shirt to reveal the vivid colors of my design. If you're working with a hard surface, like license plates, tumblers or coaster, let the Infusible Ink completely cool before removing the backing. Craft stores like Michaels, JOANN and Hobby Lobby have started carrying Cricut brand blanks as well as other brands of blanks that work well with Infusible Ink. Under each project I'll list the blank I used as well as the Infusible Ink Transfer sheets I used. I was really excited to try out the new Infusible Ink from Cricut. So what makes a sublimation blank? If your machine is an Explore or Explore 2 you can set your dial to the Light Cardstock setting. If you want to check a full step-by-step tutorial for using Infusible Ink, check out this post. Sequin Backpack with Mermaid Rainbow Infusible Ink Polyester Tote Bag with Shaylee Infusible Ink Polyester Pillowcase with Watercolor Infusible Ink License Plate, Can Koozie and Hand Sanitizer Holder with Bright Bow Gems Infusible Ink Puzzle with Bright Bow Gems Popsicle Holders with Jungle Safari (Green), Rainbow Watercolor (Blue) and Mermaid Rainbow Infusible Ink Mousepad with Windbreaker Infusible Ink Apron with Watercolor Infusible Ink I hope this gives you a better idea of the wide variety of blanks you can do with Infusible Ink. For tips, tricks and immediate help, be sure to join our FREE Cricut Support Group and/or FREE Infusible Ink Tips & Tricks Group. Before being ironed onto a blank, the colors of the Infusible Ink are very muted. Or you can try to use a sublimation coating on it before you put the Infusible Ink on Dark materials - Infusible Ink needs light colored surfaces to adhere to. Sublimation It's been a few years since Infusible Ink came out and the popularity of sublimation, as well as the accessibility of it, has grown tremendously! So why would you use Infusible Ink over sublimation? Here are a few places I've ordered from: Cricut also offers a line of Infusible Ink blanks too. I was so excited when Cricut launched the Infusible Ink line a few years ago! I had this blog but I also had a small shop where I was selling shirts, onesies, hats; you know the usual Cricut crafts. Your investment to get started with Infusible Ink is less than \$200 - even less if you already have an EasyPress. A few quick things to remember: Clean your blank with a lint free cloth or lint roller prior to preheating. Preheat your material for 5 seconds YOU MUST USE AN EASYPRESS OR HEAT PRESS WITH INFUSIBLE INK. I thought I'd be able to add the pink circle onto the donut shape and that would be it. When I'm using a heat press, I heat it to 385F. After preparing my shirt blank, by lint rolling, and pressing to remove moisture, I sat my ink onto the shirt, covered with butcher paper and pressed at 400° for 30 seconds. Step 5: Easy Pressing Infusible Ink Before adhering the ink to the shirt there are a few precautionary steps. If you're a shop owner, you know the worry in the back of your head of 'I really hope they follow the care instructions and don't ruin this'. Believe me I've done it! Sublimation is still a really cool process! And there are some projects you can make with sublimation that you just can't with Infusible Ink. I think the biggest reason is the affordability of Infusible Ink. If you want to check out the full video review with project tutorials, check out the YouTube video below: What Blanks Can & Can't You Use This is probably the number one question I get asked in our Infusible Ink help group. When removing the paper it will make a tearing sound. With Infusible Ink all you have to buy are the transfer sheets (assuming you have a Cricut machine already) and you can use an EasyPress 2. Because sublimation, like Infusible Ink, requires high heat and longer pressing times, any blank that is designed for sublimation will work for Infusible Ink. Step 2: Cut Infusible Ink Load your sheets of Infusible Ink into your Cricut with the plastic carrier side down and the color up. Donut worry, be happy! There will be no worries when you wear this shirt made with Cricut's new Infusible Ink. If you are searching on Amazon, or anywhere online for Infusible Ink blanks, the easiest way to find Infusible Ink compatible blanks is to search for sublimation blanks. You can see that the black actually looks brown and the bright pink is a light pink, to make sure the full heat of your EasyPress or heat press is going where the Infusible Ink is. Supplies: Cricut T-Shirt Blank Infusible Ink in Black Infusible Ink in Pink Easy Press 2 Easy Press Mat Cricut Explore Air 2 Lint Roller Design Step 1: Upload the design to Design Space. I was surprised at just how different the two are to work with. If you are using a Maker you'll be able to select Infusible Ink from the drop down menu. Popular sublimation blanks include shirts, tumblers, pillow cases and keychains. Be sure to subscribe to my YouTube channel to check out all my video tutorials including projects and how to's. I did this easily in the Design Space software when I uploaded my image. Once the ink has been pressed onto the fabric (or coaster) it becomes a lot more vivid. Remember to mirror your image before cutting. To get started with sublimation you'll be spending closer to \$400-\$500. Lint roller - Use this to remove any fibers of debris from your blanks before preheating and pressing. Cardstock - Put underneath your blanks if you're pressing a smaller design (like popsicle holders), or in between layers, like on shirts, to prevent the ink from possibly bleeding through. Parchment Paper - Use over Infusible Ink to protect your heat source. Other Helpful Supplies Like I mentioned earlier, the list of things you NEED to use Infusible Ink isn't very long. Layering with Infusible Ink is different from layering with vinyl. If you are wanting to use a material that is made out of ceramic, make sure it has a polyester coating. This will prevent zippers or seams from interfering with the heat. But because the EasyPress often drops heat, I start at 400F so it at least gets to 385. I've found that 40 seconds is the perfect pressing time for all the sublimation blanks I've tried. All the designs are in Cricut Design Space and you can access them on this canvas. If you have any questions leave them in the comments and I'll get back to you as soon as I can. Infusible Ink on Sublimation Blanks Project Ideas Check out the projects I made in the YouTube video below. For more Cricut projects and tutorials, check out these posts. Step 3: Weed the Infusible Ink Use the hook tool to weed the images. But if you search on Amazon, you'll find dozens of different types of blanks for sublimation Blanks you CAN NOT use with sublimation include: Cotton materials - If the shirt/onesie/pillow/etc you are using isn't at least 65% polyester the Infusible Ink isn't going to be able to fully press into the fabric. Learn about what materials you can and can't use as well as tips for working with Infusible Ink on sublimation blanks. Sublimation blanks are fabrics made that have high polyester counts (at least 65% or more), or hard materials with a polyester coating. First, you want to put a piece of white card stock inside the shirt to prevent ink from bleeding through. I was really excited to use it for myself but also to be able to create unique, one of a kind designs for my customers as well. On soft materials, like shirts and bags, you can do a warm peel. We'll show How to Layer Infusible Ink in this post. I've found 385F works great for all sublimation blanks. And there are a number of places online you can buy them too. But if you are on a budget and want to make more professional quality projects that last forever, Infusible Ink is the way to go. Your projects won't turn out as vibrant and they will fade over time and in the wash. Ceramic materials - While there are some ceramic materials you CAN use with Infusible Ink, like Cricut's coasters, not all ceramic can be used with Infusible Ink. Instead you need to make your colors fit together like a puzzle. That's on top of the 10% discount Cricut Access members get automatically! Learn more about Cricut Access here. With Infusible Ink I didn't have to worry about that as much. I peeled the pink off and lined it up with the black pieces. I've done sublimation as well as Infusible Ink and really love them both. I'm a huge fan of iron-on vinyl so I wanted to see how they compared. But there are some additional supplies that make creating with Infusible Ink easier. There are a TON of options out there when it comes to Infusible Ink blanks. This will prevent any fading around the edges. How To Use Infusible Ink on Sublimation Blanks When you're using Infusible Ink on sublimation blanks, the process is the same as when you are using Cricut blanks. If you want to do sublimation you need to buy a printer (which costs \$200+), sublimation ink, paper and a larger heat press. Be careful when handling the ink to not touch it too much, or with wet hands. I used the same image for both the black and the pink, with the first I erased all pink from the image and the second time I erased all the black. Step 4: Layer Infusible Ink Layering with Infusible Ink is different from layering with vinyl. Household irons do not get hot enough and don't hold consistent heat. When I'm using an EasyPress I heat it to 400F.
