At the beginning of the GTA3 game, a prisoner's van was robbed and two small bullets - including you, in disorder escape - started a trip through the city ... like most action games, the Grand Theft Auto 3GTA3 is also composed of many small activities, not all activities are fascinated crimes, even if most have the point is not legitimate, from helping the head to recover the horse to clean up the opposite drug dealer This is very opposite at the main game line, the protagonist has always been a small bully, you need to make a small bully should do. Of course, a small bully step by step to go up later, more "to force" the task he awaits you, and could also be "crushing the land" Albert, like a smaller series like holding a great weapon, and even grab a Great weapon a tank and police spray and see how long you can live ... unlike most action games, you can't choose a business, but you can choose the means to achieve the activity. You can honestly choose step by step, you can also take high profile, see the car robing car, see people beat, of course, too done, the police will certainly not let you go. If you feel that the main line is too tight, you can stop, walk, and even create your homework, steal the kidnapping or taking a taxi on the world that urging, with you. This reflects the high degree of interaction, replacement in a very strong "open" game very strong GTA3 can be described as my part. The highly interactive game gameplay allows you to interact with people who live in the darkest corners of the city. Gangs, women, what is the direction of the game in which to develop everything in your every move. Of course, this does not mean that the task itself is not attractive, on the contrary, the task is larger or smaller, or you need ruthless or does not make sense fun, a ring, minimum, even the most humble task is achieved a lot Interesting, not exaggerated to say, GTA3 should be considered as one of the most easily dependent on the game. Tips: It's better not to play often at night, because it's easy for you to forget to sleep, and even if it's easy to let go too excited to sleep! As a transplant work, the transplant level is its most important consideration, GTA3 performance as? Without a doubt manipulative is our main concern, in general, not bad. Although this is an action game, fortunately, the original does not emphasize how superb micro-micro-ability, as well as more keys, each key has its corresponding operation, the manufacturers simply all directly in the virtual button put on the screen, a little lazy, running, jumping, attacking, grab cars, change the camera angle, open the machine later there are accelerator, brake, handbrake, horn, shooting, etc., LED also directly to the position screen key reached 10 + a, but the layout is reasonable, the actual misoperative of play in the acceptable range, even a novice iphone with a small screen to play, as long as a small adaptation, the pre-mission will not be confused The game also supports the operation of the gravity sensor, you can open in the settings, you might want to try. However, when the "real" battle is approaching, it could still be a little too much. The biggest problem is that the unqualified point of view cannot keep up with the point of view. There is no way to find out where the enemy is. There is really no way to eat more in Turtle you will naturally be good -apkaward.com The game map is in agreement with the task of going, logo more clearly, you can also enlarge the small map, the perspective can be Quite satisfying. To be sure, the players interested for the image is also a small number, as should say it's quite satisfactory, demanding higher players can be a bit disappointed, on the one hand, in practice Original transplant, on the other hand, it seems too targeted optimization, building and strong character sense of paper, the segator is quite obvious, physical collision is not a fairly good realism, if you use the iPhone4S proposed configuration or iPad2. iPad2. The performance will be better, here to all players lovers of the recommended game Grand Theft Auto 3grand Theft Auto 3!
