Science terms that start with b

Computer science terms that start with b. Earth science terms that start with b.

Wikipedia index Science (from the Latin *scientia*, meaning "knowledge") is a systematic undertaking that builds and organizes knowledge in the form of testable explanations and predictions about the universe. Modern science is typically divided into three main branches which are constituted by the natural sciences (biology, chemistry, physics, astronomy and earth science), which study nature in its broadest sense; the social sciences (e.g. psychology, sociology, economics, history) which study people and societies; and the formal sciences (e.g. mathematics), logic, theoretical computer science), who study abstract concepts. There is disagreement, however, that formal sciences are a science since they are not based on empirical evidence. Disciplines that use science, such as engineering and medicine, are described as applied sciences. Acanthochronology à study of cacti in ordered time Acarology à study of mites and ticks Aceology à science of remedies, or of therapeutic; iamatology Acology à study of medical remedies Acoustics à sound science Actinobiology à synonym of radiobiology Aden science à study of glands Ediology à science of generative organs Agroecology à study of ecological processes applied to agricultural production systems Agrogeology à study of agrominerals Agrolgy à study of agricultural soils Agronomics à study of land productivity Agrostology à science or study of herbs Aletology à study of algenonic truth à science of pleasure and painÀStudy of smell and smell Arthrology ÀStudy of joints Arthropodology ÀStudy of arthropods as insects and arachnids Astacology ÀScience of shrimps Asteroseismology ÀStudy of stellar oscillations Astheniology ÀStudy of diseases À Study of plants in space Astrobiolology À Study of extraterrestrial life Astrodynamics À Study of rocket and spacecraft motion Astrogeology À Study of extraterrestrial geology Astronomy À Study of celestial bodies and phenomena Astrophysics ÀStudy of the behaviour of interstellar matter Atmology À Science of water vapour Audiology ÀStudy of hearing Autecology À Study of the ecology of a species Autology À Scientific study of oneself Auxology À science of growth Avionics À science of electronic devices for aircraft Assiology À science of the ultimate nature of the B value Batteriology À study of bacteria Balneology À science of the therapeutic use of baths Barodynamics À science of the support and mechanics of bridges BarologyÀ study of the gravitational force Bathymetry À study of the underwater depth of ocean beds or lakes BatologyÀ study of thorns Bibliology À study of books BiblioticaÀ study of documents to determine authenticity Bio ecology À Study of the interactions of life in the environment Biology À Study of life Biochemistry À Study of chemical processes Biomechanics À Study of the structure, function and motion of the mechanical aspects of biological systems Biometrics À Study of biological measures for safety purposes Bionomics À Study of organisms interacting in their environment Biophysics Environments À Study of the physics of biological phenomena Biopsychology À Application of the science of biology to the study of psychology Biotribology À Study of friction, wear and lubrication of biological systems Botany À Study of plants Bromatology À Study of food Bryology À Study of moss and liver Caco À Study of racial degeneration Study of birds' nests Heating Study of heat Change Study of international exchanges Campanology Study of bells Carcinology Study of crabs and other crustaceans Cardiology Study of the heart Caricology Study of thirst Carpology Study of thirst CarpologyÀ Study of fruit Cartography À Science of making maps and globes Castrametation À Art of designing a camp Catacoustics À Science of echoes or reflected sounds Catalactica À Science of commercial exchange Catechetics À Art of teaching with questions and answers Celestial mechanics À Study of the motion of objects in outer space Cell biology À Study of the different structures and functions of eukaryotic and prokaryotic cells Cetology À Study of whales and dolphins Calcography À Art of engraving on copper or brass Calcotritics À Art of taking frictions Of brass chaology « Study of chaos or theory of chaos characterization « «Chemistry «study of the properties and behaviors of substances Chirocosmetic « snow study « embellishes the hands; «The study of calligraphy or calligraphy «The study of hands Chiropodia «the medical science of the feet» the science of the geographical description The study of biological rhythms Crisology Study of precious metals Ciselure Art of metal pursuit Classical mechanics Study of the motion of macroscopic objects Climatology Study of the climate Climology «The study of aging or individual decline after the maturity «Student studies of the chemical composition of the matter in the universe and of the processes that have led to those compositions Cosmology «Student of the Cranology «Student study of the Cryminology «Student of the CryopsÀ Study of Ancient Egypt Eidology À Study of the Mental ImaginationÀ[2] Ekistica À Study of Human Settlement Electrochemistry À Study of the Relationships between Electricity and Chemical Substances Electrodynamics À Study of the effects deriving from the interactions of electric currents with magnets, with other currents, or with themselves Electrology "Study of electricity" Electrostatics "Study of static electricity Electromagnetism "Study of electromagnetic force Embryology "Study of embryos Hemetology "Study of vomiting Emmen À Study of menstruation Endocrinology À Study of local diseases Endocrinology À Study of glands Energetics À Study of energy in transformation in various fields Engineering studies À Engineering study Enigmatology À Study of puzzles (puzzles) À Study of insects Entozology À Study of parasites living inside larger organisms Enzymology À Study of enzymes EphebiatriaÀ branch of medicine dealing with adolescence Epidemiology À Study of diseasesÀ Epileptology À Study of the EpilepsyÀ Epistemology À Study of the Foundations of Knowledge Hermology À Study of Deserts Ergology À Study of the Effects of Work on Man Ergonomics À Study of People at Work Escapology À Study of Liberation from Constraints Eschatology À Study of Death; Final Object Ethnobiology À Study of Dynamic Relationships among Peoples Ethnobotany À Study of the plants of a region and their practical uses through the traditional knowledge of a local culture and a people Ethnogenesis À Study of the origins of races or ethnic groups Enochoreology À Study of dances and their cultural implications Ethnology À Study of cultures Ethnomethodology À Study of daily communication and social interaction Ethnomusicology À Study of comparative musical systems Ethology À Study of natural or biological character Etonomy À Study of the economic and ethical principles of a society Aetiology À S Science of the causes, in particular of the disease Etymology À Study of the origins of the words Euthenics À Science dealing with the improvement of living conditions Exo Biology À Study of extraterrestrial life Exoplanetology À Study of exoplanets F Felinology À Study of felines Finance À Science or management study À the art of growing and selling flowers Fluid dynamics À study of fluid flow À study of fluid mechanics À study of fluid behaviour at rest and in Static motion of fluids À study of fluid behaviour at rest Fluviology À study of courses À Study of folklore and fairy tales Forests À Study of the creation, management, use, conservation and repair of forests and related resources Fracture mechanics À Study of the propagation of cracks in materials Futurology À Study of G Garbology À Study of garbage Gastroenterology Study of the digestive system «study of gastronomy Gemmology «study of gems and jewels Gender study» genre»- study of the descent of Genesisology families - study of genetic reproduction and heredity - study of the Geochemistry genes - study of the chemistry of the Earth's crust Geocronology - study of the measurement of geological time Geography - study of the surface of the earth and its inhabitants Geology - study of the rocks of a planet Geometria - study of the dimensions, shapes, angles of the positions and dimensions of things. Geology studies - epizootic study - epizootic studyInstructions - study of biotechnologyBiology and Biology StudiesOsteology Studio - Osteotherapy Studio - Pathology StudioPsychophysical study of biology - study of psychology - study of psychology - study of psychology - study of psychology - study of psychology - study of psychology Pseudoptics - study of Pseudoptics - study of optical ilusions Psychobiology - study of mental psychology - study of psychosoptics Quantum calculation - exploitation of collective properties of quantum states, such as overlap and entanglement, to perform calculation. Quantum mechanics - a fundamental theory in physics that describes nature at the smallest scales of energy levels of atoms and subatomic particles Queer Theory - study of issues related to sexual orientation andstudy of biology - studies of biology and biology coat of arms - study of relations between the text stoichiology - science of the elements of animal fabrics stomatology - study of the mouth storiology - study of popular stories stratigraphy - study of geological layers or strata stratigraphy - art of conducting a stilometry of the army - study of the symbols of literature by statistical analysis on theicidology - study of suicide chemistry supramolecularTheology study - clinical study of clinical studies - study of biology Study of throfology - study of biology Tsiganology - study of Gypsy Turbology - study of tornado Turnery - turning art in a lathe Tifology - study of blindness and typography - art of printing or using type - study of sorts of things Uranography - study of descriptive astronomy and mapping Uranology - study of sky,animal distribution Zoogeology - study of fossil animals remains Zoology - study of animals Zoonomia - animal physiology Zoonosology - study of animal diseases Zoophysics - study of animal diseases Zoophysics - physics of animal bodies Zoophysiology - study of physiology of animals Zoophysiology - study of animals similar to plants Necroplanetology: Simulating the breaking of planetary material differentiated WD 1145+017 "punnology", The Free Dictionary, recovered 2020-12-24 Recaptured by " " .
