Los procesadores de texto más conocidos son:

- El simple Bloc de Notas de Windows.
- El WordPad de Windows.
- El Microsoft Word que trae el paquete Office.
- El paquete StarOffice y el OpenOffice.org, ambos con editores de texto gratuitos.

Online in addition to Word, but it's a good addition that we can install on our computer. We can have the content of styles, changes, appearances, etc. The processor also works with it offline. FreeOffice download here. You will throw very few missing elements. If we cannot afford to exhaust many resources from our pc, this program is interesting, since it is very light (about 12mb). For its part, the editor only has the function of creating or modifying the text in S& and does not allow more modifications. Although its popularity has fallen, it is still an option to take into account. Offline option does not always respond with guarantee. Its interface is very similar to Word, so it will not be difficult to understand. It is an alternative not only to work alone, but also in a group. Access a Dropbox role. And this is because it is not a normal text processor, since it incorporates very specific functionalities. It is compatible with the majority of operating systems such as Windows, MacOS or Linux. In addition, like the processors mentioned above, it also does not require the installation of any software (you must also register). OpenOffice This text processor is one of the most known and used free programs for quite some time. Its interface is very basic and of strong learning, due to advanced and novel users they can use it without problems. We will notice that the existing functionalities are broad and we will not miss almost any. If, we have to emphasize that this program works with its own file format. Its interface is very current and understandable, so as the tools of its processor. It has several templates available depending on the document we want to generate. Then, with the document concluded, possibly export the content to platforms as popular as WordPress, Dropbox, Tumblr or Google Drive. WPS Office WPS Office application is another alternative if we want access to a free text creation package. Free linen processors all these programs that we have cited, are the most prominent to install on our computer and perform all kinds of creations and text editions. The best free processors have already commented Microsoft Office Package Word program takes the palm when creating our documents. It is the easiest and simplest to use, being also compatible with Word and LibreOffice files. All your Borator documents will be saved in the cloud and have the option to share them on other platforms. Although at a given time they may have similar functions, they are not exactly the same. Again, it is a text processor that we can access online. However, some more advanced options that can be used for companies require a subscription. Although it is also possible to apply format that from zero. Its editing tools are varied and wide, allowing the installation of plugins for extra options. With its text processor in online format. The only requirement to use it is to have a Google/Gmail account, something very common. With it obtaining access to the most basic functions of editing and text format. It has a very basic design, quite similar to that of Microsoft's Word program. We propose several style tools that encourage you to try. It has a high number of format options and is compatible with virtually all Office files. Put it down here. We can even add some plugins to complete your functions and adapt it to our requirements. If our demands are high, we can stay short. It has some disadvantages with respect to its competitors, but it can remain a reliable alternative. Practically, any of the programs you have on our computer and fulfill their functions, we can catalog it within this range. But not everyone has access to it, either by using another system, by the price of its official version or simply because they do not convince you of their tools. In summary, we can determine that the processors create text and provide format, while editors do not allow to apply specific formats. Download here. All tools found in the computer application, are also available in Word online. It is available in this link, although your version for Windows is not active at the moment. It has one of the clear and simple interfaces to which any user can access. All are free and, who knows, if they end up convincing you more than Word and ended up adopting it as a reference text processor. They work exactly the same and allow us to make steps from the network itself or in the cloud. Draft Draft is a very particular text processor closely focused on professionals. Surely many of them are unknown by the average user. Whether we can adapt any processor to our demands a prideal processor this is one of the usual errors, confuse an editor with a text processor. If we think of a text processor, it is very important to the Word. For example: writers, journalists, teachers of educational centers or working groups. Whatever reason, there are currently a multitude of alternatives at our fingertips. With more than 20 years of use, it continues to receive updates. We can even find an app on Google Play La Apple Store. You can download it in this link. However, it is also possible to manage it from the cloud.
