Get detailed information using real-world examples and wipe your records, making them better than ever. No matter what daw you use, the izotope Rx 4 explained provides specialized knowledge that allows you to reduce unwanted noise and eliminate damage to your precious audio. Mike begins with a detailed introduction that covers everything, from the user interface to the various configurations available in the izotope rx 4. You will also learn all about the display Waveform and spectrogram, recording in RX 4 files and saving files. Mike then demonstrates the power of bookmarks and regions, as well as RX Monitor & Rx Connect plug-ins. Then you will see and listen to examples of the real world of noisy audio treatment with the denoise and distortion modules. Using overwhelmed samples, Mike demonstrates how easy to reduce the noise and distortion using RX 4 in Pro Tools as well as plug-in itself. You will also learn more hum & buzz removal as Mike until the use of the module hum. When it comes to spectral repair, you will want to check Mike's tips to remove unwanted noise, including camera shutter clicks, microphone pops, whistles in a concert and more. Classic recordings and vinyl enthusiasts will also love this season as it covers restoring vinyl records and magnetic records using RX 4 to clean scratched records and noisy recordings. Moving, Mike covers the module module & shouldb, where you will learn to easily get rid of unwanted reverberation, mouth clicks and excessive use of plottrum in bools and acoustic guitars. If you need to get a better level in levels and volume, Mike will pass through the Izotope RX 4 clip gain feature, and also will see how to make your recordings with the intensity specifications accepted using the volume volume. Correspondation eq and environment is © important, important, When it comes to dialogue recording, Mike also covers the characteristics of eq match & ambience of izotope rx 4. If you need to separate tone sounds into a recording, you will love the explanation And Demonstration of Deconstruct's mode as Mike shows how to break respiration sounds into a flute recording and how to remove the components of a chiming clock. Finally, Mike passes through all the processing modules of signals in the Izotope RX 4, including Gain, EQ, Channels Operations, Spectra Analyzer, Hosting Plug-in, Time & Pitch, Resample and Dither with examples for each.
