It’s a bunch of warnings about content: violence, blood, sex, drugs, nudity, language, sexism, incest, rape. Actors also brilliantly portray their characters, and the plot is interesting and unpredictable. Geralt and Yennefer are both terrifying, mysterious and relatable. We hope to see more magic than Witcher and tales of Care Morhen in season two. Witcher takes more interesting and realistic positions on morality, sex and violence of most Game of Thrones (which tends to glorify repeatedly torture, rape and incest). I wish they had made some effort to distinguish between the two timelines shown in the first season, even if- if you forgot to notice small differences in politics or in the age of characters, it was easy to lose that the timelines had changed. Less than a minute after the first episode of The Witcher, we see our hero in full monster hunting mode. While fighting a kikimo, a disgusting creature like an insect in a muddy swamp. He briefly loses his silver sword and is trapped underwater by the angry beast, but it’s an exciting and frantic introduction to the series, and from the start one thing is clear: Henry Cavill will be as big as Geralt of Rivia. Once the monster has fallen we are treated with a close-up of the sorcerer’s face; black eyes, pale skin, pale veins. Evidence of poisoning caused by creeping potions, and our first clue that the people who perform this show care about the finest details.Geralt rides in the nearby town of Blaviken, looking for the advisor, the one who put the bounty on the monster. Entering a tavern, the band stops playing and the customers look accusingly. “We don’t want your kind here, sorcerer”. One group. This establishes an unpleasant fact for our hero: people do not like sorcerers very much, despite the important public service they provide.A struggle almost breaks out, but a woman, Renfri, intervenes. The men come back down and the couple chat briefly at the bar, a burst of sexual tension running through the air as she heroically drinks a couple of bottles of beer. A local girl, Marilka, promises Geralt that Stregobor, a magician who lives in the city, will buy the corpse of the monster and find himself in the magician’s tower, whose interior has been transformed, with illusory magic, into an idyllic garden cared for by young naked women. Geralt rightly suspects that the misunderstanding with the kikimore was actually a ploy to lure him into the tower of Stregobor. The wizard has a job for Geralt, he says. A monster to kill, but not the kind he’s used to. “The human race, he says with a left twinkle in his eyes. “The human race. His name is Renfri. Geralt met before, whose talent for knocking down pints made him all hot under the dry meat. On the streets a girl plays a game of hazelnuts with some other common people, but is taken away by a trio of knights and revealed to be nothing but Princess Cyril. Ciri stands in the throne room, now dressed in the beauty of a princess, and watches his grandmother, Queen Calanthe, honor a parade of loyal soldiers226; 128;A but it is clear that he finds the life of a monarch rather boring.Back in Blaviken, Stregobor tells a skeptical Geralt about the so-called curse of the Black Sun. Renfri, he explains, was born under an eclipse and is so cursed, being more of humanity’s monsters immune to magic as a result of “internal mutations.” According to the magician, she is the last of the women of Lilita and demon goddess of the night and must be destroyed. But Geralt’s not convinced. Sorry for the short, but I think it’s important to say how good Henry Cavil’s voice is. The actor not only captured the dry cynicism and live performance of the character, but also that important background of warmth and humor. Doug Cockle, Geralt’s voice in Witcher video games, will always be my Geralt of Riveiaâbut Cavill did a great job here. And I’m happy to say your wig looks a lot better than the one you did in those early tests, which looked a little bit like a bad Legolas game. Cavill is perfectly projected here. Henry Cavill not only captured the character’s dry cynicism and direction, but that important background of tow warmth and humor in Cintra, at a sumptuous party held in the castle, Calanthe receives news that the Nilfgaardian Empire is marching on the city. As Ciri dances, King Eist wonders why The Queen doesn’t give her the news. This could be her last party for a while. He responds gravely, letting his granddaughter enjoy one last moment of innocence. It is a touching scene, brilliantly played by actor Jodhi May. In a beautiful sunny forest on the outskirts of Blaviken, Geralt collects herbs to make one of those potions he likes so much. Renfri appears out of the trees, telling him she was once a princess, but the men of Stregobor raped her and drove her from her kingdom, forcing her to a life of desperate survival. She is in Blaviken seeking revenge and this is the real reason why he wants her dead. Geralt’s neutrality is an important part of his character, and makes it his duty to choose which side to stand in the rivalry of Stregobor and Renfri particularly worrying for him. In this episode he quotes his old friend, mentor, and colleague Vesemir: “Witches should not play white knights.” Geralt tells Renfri to move on with his life, to abandon his quest for revenge, and she seems to agree. Then that sexual tension bubble finally bursts and they spend the night together. On Marcontinu Stairs, a step in the mountains of Amell leading to Cintra, a fierce battle breaks out between the Cintran and the Nilfgaardian invaders with Queen Calanthe and King Eist fighting in the front line. This is our first great battle in the series and is indestructible in its brutality, shot in a shaky and intimate documentary style. In the midst of chaos, an arrow suddenly strikes the king’s eye, killing him instantly. It is a shocking and cold unceremonious death. (Credit Image: Netflix) Calanthe traces the source of the arrow to a lonely black knight in the distance, watching calmly the progress of the battle. We’ll see more later. In the castle Ciri walks, worried about the battle, to Mousesack, a druid and loyal advisor to the royal family, if his grandmother is well. After a busy silence: “Everything will be fine, princess,” he says, avoiding a direct “You are his blood.” Again on the battlefield, come other soldiers of Nilfgardians, waving the left black flag and gold of the Empire. The battle is lost and the invaders reach Cintra and will conquer it, everywhere but the castle, where Calanthe managed to escape. Mousesack throws a magic barrier on the walls, keeping out the Nilfgardians for now.Alas, the barrier fails. Ciri cries as her dying grandmother admits defeat, preparing to surrender to the Nilfgardians. Then the Queen tells Ciri to find Geralt of Rivia. “It is your destiny,” he says. And to a young knight, Lazlo, charged with protecting the princess, adds that the security of Ciri is of the utmost importance, because © “The world depends on it.” It seems that fate has something in store for her. Ciri is dragged away by Mousesack and Lazlo, while fleeing through a series of tunnels built under the castle. During the escape Mousesack sacrifices himself to protect Ciri as he approaches the black knight who killed the King earlier. A note aside: the knight, Cahir, is played by Eamon Farren, who recently appeared in the third season of Twin Peaks in the role of the terrifying Richard Horne. While Lazlo runs away with Ciri, he asks him, “I have been protected my whole life. But the knight catches an arrow in the throat, courtesy of Cahir, before he can answer. Then we return to Blaviken where Renfri seems to have had second thoughts about Geralt’s proposal. He discovers that the city is full of thugs from the pub, actually Renfri’s men, and follows a fight, giving us another look at Geralt in combat. I was immediately on board with Cavill in Geralt’s shoes, but here I was sure he was born to play the role. This is a brilliantly choreographed and surprisingly horrifying combat scene, sculpts the thugs of Renfri, finishing the last man from to cut off his head. Then Renfri comes out of the shadows, holds Marilka hostage, saying he’ll kill everyone in Blaviken until Stregobor gets out of his tower. It seems that he still has revenge in his mind. While Cintra burns, Cahir rides the countryside on horseback with Ciri tied to his horse. She looks back at her city in horror, now on fire, and screams O Å a shrill scream, piercing her ear that, somehow, causes the horse to panic and makes them both snap. She screams again, louder than before, shaking the earth, which opens a shattered abyss between her and her jailer–128; giving her the opportunity to escape. Cahir seems disconcerted and frustrated, insecure about what he has just seen. Ciri runs into the woods. In Blaviken, Geralt and Renfri fight when it becomes clear to the witch that she is willing to massacre the entire city. The duel is fast and wild; Another example of the show’s brilliant and brutal choreography. “ They created me just like they created you,” says Renfri. “We are not so different.” Geralt resists several opportunities to kill her, but eventually falls on his blade. “The girl in the woods will always be with you,” he says as he dies. “ She is your destiny.” The threat is gone, Stregobor appears, looking at the traces of bloody bodies left in Geralt’s wake. He told Marilka that he intended to bring Renfri’s body to his tower for an autopsy, but the witch put a sword to his throat, inviting him to leave her alone. I don’t know what’s going on inside Geralt’s head, but I think part of him believes what Renfri said about Stregobor. But before he can act, the villagers turn on him. “You’re a beast!” he shouts. Others throw stones.Stregobor smiles at himself as GeraltH26; 128; Å a the Butcher of Blavikenâ 128; Å a Å leaves the city clutching the pin of We hear his voice, repeating that enigmatic phrase before: “The girl in the forest forest “It is your fate, and then a cut in Ciri, terrified, running through the woods.” “A 160? And so ends the first episode of The Witcher, one of the best openings of a series I’ve seen in a while. It looks fantastic, it’s beautifully projected, the action is beautifully choreographed, and Henry Cavil is perfect as Geralt. A promising start. Compared to the Cintran soldiers’ nail plate, it looks almost organic. Like medieval armor as imagined by H.R. Geiger.226; What? At Cintra’s party, Eist tells Calanthe to see the Wraith of Mgg; 182gg. This is the name Skelligan for the Wild Hunt, the icy spectres that seek Ciri in Witcher 3.226; 128? While fighting his way through the Renfri gang in Blaviken, Geralt strikes a couple of them back with a burst of kinetic magic that Witcher fans will recognize as the sign of Aard.226; I love that threatening photo of the black mass of Nilfgaardian soldiers singing the hill, silhouettes against the sky. The eyes of Eist and Calanthe fall, knowing deep down that Cintra is doomed. Dead.
