Th9 laboratory upgrades. Th9 lab upgrade list.

Its called "the crows TH8.5 version" Spell factory. This will allow you to store DE for double hero upgrade first will have an impact on your base weight and ultimately determine your match-up in wars. I pushed to 10 and I can guarantee it is worth it but if you refuse, at least get them to 9. So grind hard for her, or just use her to farm for herself initially. 40k is just to buy half of your AQ, you need lvl5 before you get the full deal, so get her up asap. Weight is determined by looking at the strength of your AQ, you need lvl5 before wou get the full deal, so get her up asap. Weight is determined by looking at the strength of your AQ, you need lvl5 before wou get the full deal, so get her up asap. priority right off the bat. You can upgrade giants/goblins after that but not necessary really. You need 11mil gold to bring your new walls to level 10. It is now time to introduce a few new defenses but take it very slow. Check out my TH9 farming guide if you're having difficulties. Collectors Air defenses to 8 (massive DPS, very little war weight) Air sweepers to 6 (devastating to air assaults) Hidden Teslas to 8 (what they can't see will definitely hurt them) New walls to 10, it will cost only 11 million to get all 25 walls to level 8. While farming, dump all excess gold into walls and bring them to lvl8 and excess elixir to upgrade those lv18 to lv19 elixirs. Just stick one builder here and upgrade both levels. Barracks. If so, prepare your xbows and upgrade through TH10 as quickly as possible! Feedback Please ask an Admin to add this guide to the {{Strategy Guide Feedback}} template so feedback can be collected. Having 8mil/8mil is good because you can store more loot between upgrades. It may be more efficient to upgrade DE drills here instead of army camps. This will be your clan castle builder coming free after doing both army camps. If you have at least 4 builders, leave 4mil gold to upgrade your clan castle. Drills have better bang for buck at lower levels, so upgrade them evenly. This one troop can actually stop enemy attacks and allows you to defend loot with lv11/2 defenses. If you have the 5th builder, build your new air sweeper then farm 2.25mil elixir while waiting for the air sweeper. Once air sweeper is done, upgrading AQ = lvl0 AQ While upgrading to TH10, you may work on your second dark barracks, remaining barracks (I recommend upgrading the second barracks to max before working on the third one) or gold/elixir collectors 4th priority upgrades: (do these as fillers and if you cannot to afford necessary higher priority upgrades, do not overstay TH9 for these upgrades) Traps. Many people find maxing walls at TH9 too tedious and are content at level 8 or 9. I prefer barbs first because their hp increase is more significant. Once you unlock baby dragons, you can use the same builder to upgrade I strongly recommend you to jump to TH10 as soon as you reach here, there is a base design there, copy that manually. Tried archers first for once and didn't feel it was worth itSince you used all your elixir into lab, you'll need to farm more elixir. DE storage. Upgrade wallbreakers to lvl5. Then upgrade balloons till lvl6. With lvl1 hounds, lvl6 balloons and proper cc support (maxed TH12 electro/hound), you can do well in CWL. The earlier you come into TH9, the better. Upgrade one barracks all the way to lvl11, neglecting the rest even if they are lvl2. Get it up and out of the way, its tough but you'll need to endure. I like to set them on ground because it gives you a chance to stop ground attacks. Don't make it too easy for your equal to 3 star you! This strategy will help you take advantage of players who rush their bases and pay little attention to strategy. If your DE is overflowing even with AQ upgrading, upgrade your BK as well.Advanced consideration: if this is not your first time playing, you can consider going to TH10 now. Use one or two builders here to bring your new gold and elixir storage to max. The extra 5 spaces will allow you to have 1 electro dragon in your defensive cc which is one of the best clan castle troops for offense and defense. Upgrade army camps again because 80k really isn't enough for decent AQ levels. After your AQ isn't upgrading, better keep her going. However if it is your mini account, feel free to rush faster. The problem here is your income isn't too much and it easily doubles at TH10. In short: Builder 1: AQ1 > AQ2 > AQ3 > ... > AQ65Builder 2: lab > storages > army camp Builder 4: Clan castle > DE storage lvl5 > DE drill to maxIf available, builder 5: air sweeper > Army camp inappropriate content, please report it here: Clash of Clans Wiki:Report After that, you will need 375mil of either gold and elixir to max your walls. Giants to 7, this might be the best upgrade in the game. Having 5 additional troops for offense and defense always help. From 8 to 10 will cost 37.5 million gold/elixir. Take care of other priorities but this can be done fairly early on. You'll want lvl6 barch upgraded immediately, they're the only thing you need to farm with. Xbows. The goal is to have you hit your equal position opponent for more stars than they can hit you. If you set them on air, you would likely be crushed by both air and ground. Maxed walls, 220 army space, 15/15 heroes. Giants receive a massive increase in HP/HS when they go from level 6 to 7, take advantage of these tanks while looting early on. Updated 07 Sept 2019 Ideally, you'll want to be here without maxing either TH7 or TH8. Don't forget to farm dark elixir at all times for AQ. That is an example of a bad player and a liability in war, despite their maxed defenses they're weak and bad examples. The second dark barracks is optional. Skeleton traps, giant bombs and seeking air mines give good value and they're probably low leveled if you rushed previously. Collectors. Then, upgrade barbs to lvl6 in lab. I find crystal league 1 or 2 is the easiest to accomplish this. As soon as your TH finishes, you need to... NEVER STOP UPGRADING AQ, SHE SHOULD BE YOUR FIRST AND ULTIMATE PRIORITY UNTIL SHE IS MAXED.Lab. Baby Dragon to 4, allows a successful baby loon attack which might just become your favorite looting army Lava hound to 3, for the baby loon attack Golem to 5, ideal for war attacks Your call, focus on troops you use the most often from here Defenses By now, you've maxed your resource buildings, placed all your new traps. While your TH8 is upgrades: Archer queen, Archer queen, Archer queen, Archer queen, Archer queen, Econd priority upgrades: (start these after lab and sf are done) Don't forget to keep archer queen upgrading as much as possibleBefore lab completes, try to farm up to around 6mil elixir. Upgrade your storages to spread your loot around more. While upgrading storages to spread your storages. account, having 200 troops isn't that bad. She's so important that I need to repeat myself thrice. They should be at lvl3 right now, so upgrades combined cost around 60-90mil elixir, so you can easily finish all lvl8 walls with the excess gold. Lab: For lab, it should be: barb > arch. If your builders have completed all first to third priority upgrades (regardless of AQ level), you should just upgrade to TH10 because there is much more DE. Heroes should account for 15% base destruction each when attacking, anything less and you're asking too much of your troops. Once you've met these criteria or you're impatient and hit the minimum, you can make the move to TH10! First Order of Business Do not be tempted to hurry the upgrade timer on your TH. Use that time to fill your gold and elixir storages to 7+ million each (8 is max). No point maxing TH9 either because TH10 loot is far better. Pre-TH10 checklist TH10 guide To contribute in a war focused clan, it is important that you upgrade your base at a pace that gives you the highest advantage in wars. Each base has a "weight" associated with it that determines your match-up in the war. End result of TH8 grinding skulls? Upgrades to Max Quickly These buildings add little to no war weight so knock these out sooner rather than later. If you follow my TH9 journals, you know that AQ requires 25k DE/day up till lvl40. This article is intended to help players upgrade through Town Hall 10 (TH10) while giving them the best advantage in wars. This will clean out your elixir storages full. You'll never want a break in your research lab, keep it going non-stop. After you've got a few of your favorite troops upgraded, you can take a break from the research lab and work on these elixir Drills to level 6 Once your Clan Castle is upgrading, you'll want to buy all the new available traps and upgrade them to TH9 max. These two paths will keep your builders working and your gold/elixir storages churning. As always, keep pushing those hero upgrades (or favorite DE troops) with any DE earned during this time. Max it out to store 190k DE when you have time to farm excess. The hero grind takes so long that almost any maxer will inevitably have maxed defenses, idle builders before even halfway done with heroes. Maxed walls, 200 army space, 10/0 heroes. Just upgrade your walls as much as possible. These are the player with 15/15 heroes with TH5 defenses. Then upgrade your walls as much as possible. These are the player with 15/15 heroes with TH5 defenses. Then upgrade your walls as much as possible. have different preferences based on your main troop layouts but here are some suggestions. Barch only takes 8 days to max, after 2 days of lab upgrade. This should take 18 days in total if you only use 1 builders. Gold and elixir storage. It took me 30 days to reach TH9 and another 30 days to reach TH10, this is a reasonable guideline and speed for a new player. Unlock her and keep her upgrading. You shouldn't need to use spells for farming anywayClan castle. Likewise, after army camps are done, upgrade dark barracks. Look into global and see most TH9s, you'll find that they have maxed TH9 defenses yet not even lvl15 heroes. These are the cornerstone of your TH9 defense and at level 1, they give more dps and hp than all TH8 defense upgrades. If you want to unlock troops, get one to lvl6 first so that you can farm enough for more important upgrades. Once army camps are done, use a second builder here. Dump excess gold into walls. The hit points really do make a difference and can slow heroes and high damage troops significantly. Heroes are tough to upgrade but make sure your K/Q are level 20+ minimum. Upgrading to Town Hall 10 When to go TH10 It is always recommended to upgrade your town hall only after every building, troop, wall, and hero is completely maxed. If you are the anxious type, at least wait until everything besides heroes are maxed. If you make the move too soon, your offense will never be able to hit a normal TH10 for more than 1 or 2 stars. Barch lvl7-8 easily trumps both of them Overall: barb 6 > arch 6 > wb 6 > loon 6 > open-ended War troops: lava hound, hog riders, healers Farming: TH9 farming guide Recommended stay time: 10-30 days ideally. Generally, you'll want to make major improvements to your offense starts to catch up to TH10 criteria, you'll start to mix in defensive weight. Complete each step before moving to the next. You will tell from you war match-ups if you go too quickly! New Cannon and Archer Tower to 11 New X-Bow to 3 New Bomb Towers (4) to 9 Mortars (4) to 9 Mortars (4) to 9 Mortars (4) to 9 Mortars (5) to 4 Cannons (6) and archer towers (7) to 13 Infernos to 2 and 3 (this is the main factor in weight, once they hit lyl 3 you will see little change in war opponents) Balancing Keep an eye on the types of bases you are consistently 3 staring. Don't worry if you cannot max it before TH10. Spells (healing, jump, freeze...) Valkyries to 5, like giants, valks receive a massive HP boost between 4 and 5. Build 50 new walls, new lvl1 archer tower, lvl1 mortar, lvl1 wizard tower, lvl1 air defense, lvl1 giant bomb and lvl1 seeking air mine. You will be able to farm at full TH9 speed within the first 10 days of TH9, capitalize on that. This TH marks the start of heavy DE grinding. If you get to the point where you're able to 3 star your egual in war, consider moving to the next defensive building step. This is the time it takes to get your AO to lyl10-15 while finishing all first to third priority upgrades. Do not upgrade them past level 1 for now, Dark barracks. This is why I say its dumb to stay in TH8 working on walls while you're supposed to be in TH9 working on offenses. Start one builder on the drill and let him upgrade until all drills are maxed.
